# Android Wireless Setup (January 2021)

Connecting to LSUHSC-Secure wireless with an Android device

- Go to Wireless & networks/Wi-Fi settings to manage any available networks and choose "LSUHSC-Secure" from the list of available networks.

- Enter the following when prompted
    - EAP method is PEAP
    - Phase 2 authentication is MSCHAPV2
    - CA certificate: do not validate
    - Domain: lsuhsc.edu
    - Identity: your LSUHSC username
    - Anonymous identity: leave blank
    - Password: your LSUHSC account password

- Click connect (or similar) and it should show you are now on the LSUHSC-Secure network
